DETAILED ACTION

Priority

Acknowledgement is made of the claim to benefit of Patent 6,558,400, the corresponding application filed on 05/30/2001.

Information Disclosure Statement

The information disclosure statements (IDS) received on 1/12/2004, 5/26/2004, and 2/11/2005 are acknowledged. The submissions are in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statements are being considered by the examiner.

Please submit the references that have been crossed out on the IDS in order for them to be considered.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims **1-52** are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. A non-artificial "gastric pouch", is part of the human body and is unpatentable. Claims directed to a non-artificial "gastric pouch" and not a method of creating a gastric pouch, or an apparatus for configuring a gastric pouch are nonstatutory. The last paragraph of MPEP 2105 states, "If the broadest reasonable interpretation of the claimed invention as a whole encompasses a human being, then a rejection under 35 U.S.C. 101 must be made indicating that the claimed invention is directed to nonstatutory subject matter."

Art Unit: 3734

Because the independent claims read on a "naturally occurring" stomach, they are rejected under 35 U.S.C. 101. Further, because the structure claimed in the dependent claims can be applied to a "naturally occurring" stomach, they are also rejected under 35 U.S.C. 101 with their corresponding broadest reasonable interpretation.
